Memo to File  
Regional Stockyards

On July 11, 1990 I meet Joe Montgomery at the truck repair building on Division Street. Montgomery Metalcraft had excavated three underground storage tanks the previous day and during the project found an unknown tank located near the northeast corner of the building. The tank contained water and Mr. Montgomery requested permission to dispose of the water at the wastewater treatment plant. The water, about 750 gallons had been off loaded into two 500 gallon bump tanks. Samples for metals, and oil and grease were taken for analysis by CASI. The verbal results from CASI were called to this office and permission was given to take the material to the Southwest Plant. The shift supervisor was called and informed a septic tank truck would be bring the water. Results of the test are attached.
